## Hitachi Asia Ltd.

Solution

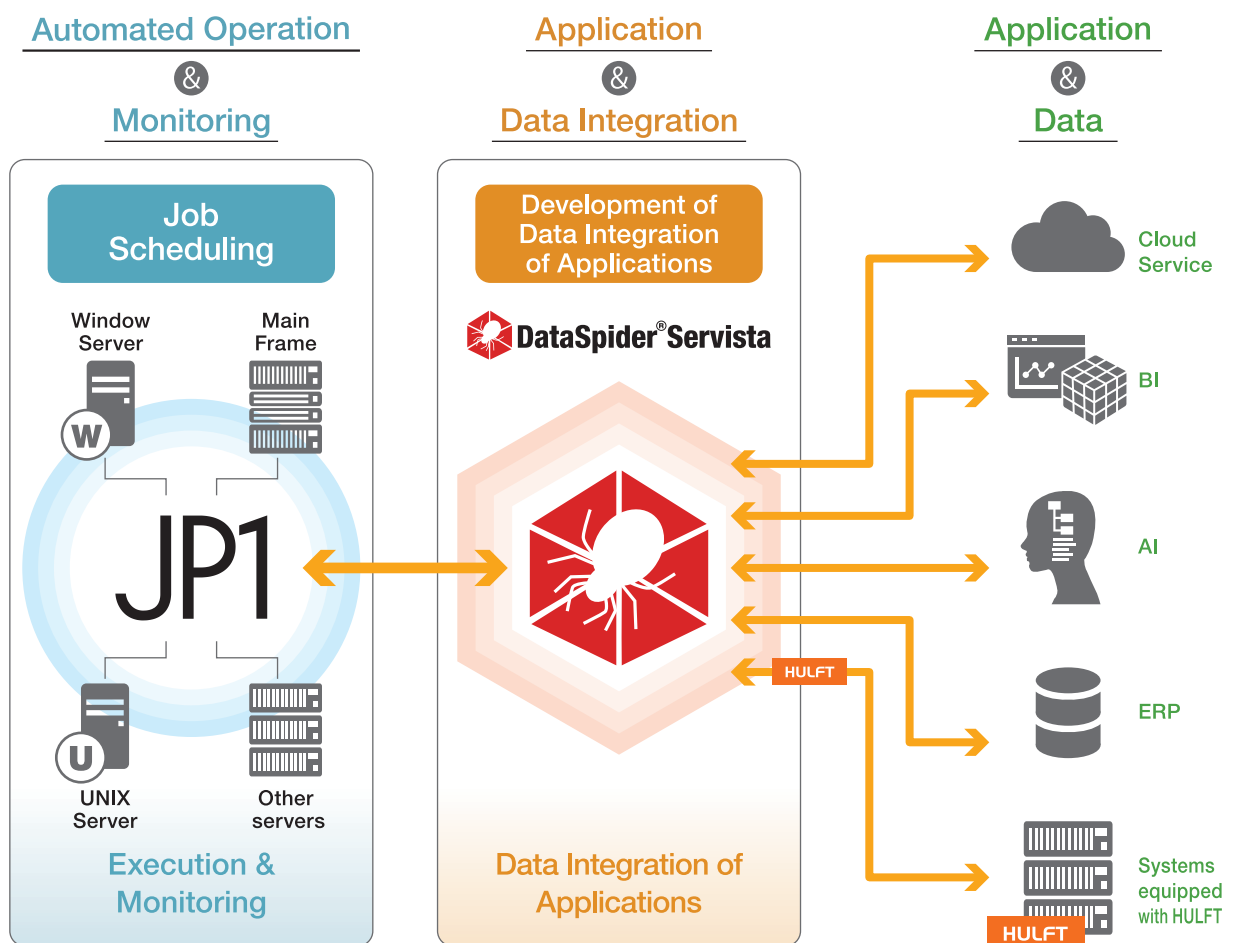

### Integrate Workload Automation and Data Integration services to achieve high-speed/quality automated system operations

Solution overview

## JP1 × DataSpider® Servista

"JP1/Automatic Job Management System 3 (JP1/AJS3)", a workload automation / job scheduling tool combined with DataSpiderServista, enables automated data integration between various systems and applications to achieve operational productivity and agility.

- ◆ Automated data integration of applications without the need of programming
- ◆ Data integration among internal operation systems, web-based systems and cloud services
- ◆ Secure data transmission through the use of DataSpiderServista's HULFT adapter
