

Your business undeniably, relies on data.
“HULFT Backup as a Service” assures your backup data is truly reliable.

Solution overview

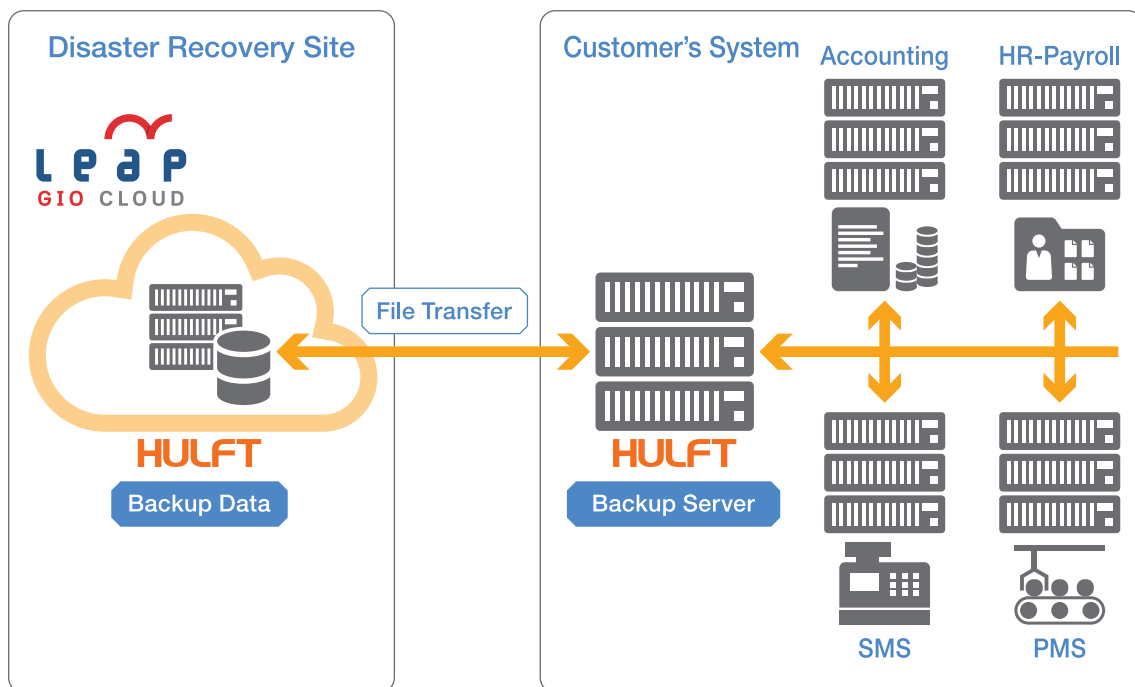

With HULFT’s cloud backup service, your data can be easily and safely copied to, and restored from a separate, remote location.

Your business will continue running no matter what happens to the data at your main site.

Features of the HULFT Backup Service

- **Highly secure** — data encryption and integrity confirmation
- **Extremely reliable** — automatically resumes previously failed jobs, guaranteeing delivery even on unstable networks
- **Super fast** — transfer files at speeds 6x faster than FTP
- **Cost efficient** — pay-as-you-go payment model that optimizes IT costs

Minimum configuration 7,000THB ~/Month *VAT is not included
